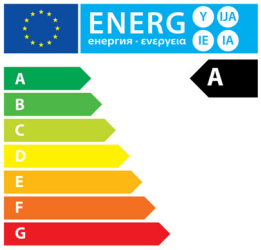
Highlights

Energy efficiency class A



This vacuum cleaner is engineered to achieve full performance with an energy efficiency class A.

AirflowMax technology

AirflowMax technology maximizes the airflow, allowing the dustbag to unfold uniformly, so you get high performance, even as the bag fills-up!

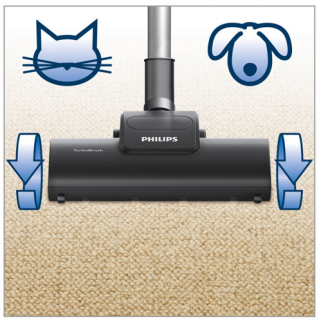
High efficiency motor

The high efficiency motor has been optimized to use less energy in order to generate more airflow.

TriActiveMax nozzle

TriActiveMax nozzle with 3-in-1 cleaning actions perfectly seals to the floor to maximize dust pick-up. 1) It gently opens the carpet with its specially designed soleplate to remove the dust deep down. 2) It sucks up big bits with its larger opening at the front 3) It sweeps up the dust and dirt closely alongside furniture and walls with its two side brushes.

Super Turbo brush

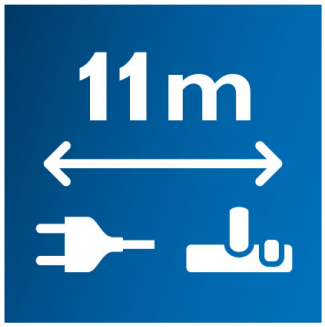


The Super Turbo brush allows deep cleaning of carpets, easily removing hair and fluff. The rotating brush inside the nozzle actively removes small dust particles and pet hair, resulting in a better cleaning performance. The wheels of the nozzle prevent damage in case of use on hard floors.

5L dust capacity

The specially designed 5L dust chamber allows you to make optimal use of your dust bag, so you can clean for longer.

Long reach



The 11m reach allows you to clean a larger surface without having to switch the plug.

Power control

The variable power setting allows you to select the optimal level of suction for the different types of surfaces you vacuum.
